Claims 1-54 are presented for examination.

Applicants' request for continued examination filed July 21, 2004 has been received and entered.

Again, the preliminary amendment filed August 30, 2001 has been received and entered, however, the amendment does not comply with 37 CFR 1.173(b) as all added claims must be entirely underlined.

Applicants' amendments filed March 10, 2003 and July 21, 2004 have been received, but not entered as they do not comply with 37 CFR 1.173(b).

Accordingly, the rejections made under 35 USC 112, first paragraph and 35 USC 101 double patenting as set forth in the previous Office action at pages 3-5 are hereby withdrawn.

The applicants send in a copy of the Offer to Surrender Declaration that was executed on September 7, 2001, so the requirement has been fulfilled.

Allowable Subject Matter

Claims 1-8 are allowable.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a

Art Unit: 1614

nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 11, 21, 31 and 48-54 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 5,814,632. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present application teaches a method for treating a patient with sepsis with riboflavin and/or riboflavin derivatives, and the patented application teaches a method for the treatment of disease selected from the group consisting of: which includes sepsis with riboflavin and/or a riboflavin derivative too. Also note the patented application dosage range for the active ingredients is 0.5-500 mg/kg and the present application range of 0.1 to 500 mg/kg is totally encompassed by the range of the patented application.

Claims 11, 21, 31 and 48-54 are not allowed.
